WORK EXPERIENCE

Engineer
Virtusa Consulting Services Private Limited, Chennai
05/2022 – 04/2024
Project: CITI FXLM OPS Tech
Tasks

- Involved in understanding client requirements and project functionalities.
- Developed UI and functional test cases using test design techniques for front-end screens by understanding the requirement document.
- Created test cases to validate backend data flow by utilizing input from Eclipse IDE and conducting behavior checks directly within the database.
- Logged the bugs in Jira and followed up with the developer until the bug was fixed. About 20+ critical defects have been found and fixed.

Project: Fablestreet – E-commerce Domain
Tasks

- Understanding the application flow and planning of modules to be tested.
- Conducted manual testing and updated test case document with accurate test status.
- Setting up test environments for automation testing.
- Designed and executed test scripts across multiple browsers to ensure product quality and did End-to-End testing.
- Utilized the extent reports tool to generate detailed test execution results for effective defect analysis.
- Actively engaged in peer reviews to ensure high-quality testing throughout the project.

Intern
Virtusa Consulting Services Private Limited, Chennai
12/2021 – 03/2022
Project: Vacuum Cleaner Service Booking
Tasks

- Understanding application functionality and workflow.
- Documented test scenarios and test cases based on requirement document.
- Did manual testing and marked the status of test cases to ensure the application is working according to requirements.
